ABSTRACT:

PROBLEM TO BE SOLVED: To provide a portable communication equipment capable of constituting a large screen through the use of plural displays and more widely using a narrow installation space.

SOLUTION: This portable communication equipment consists of an equipment body 4 having a transmission/reception part, a control part and a storage part, a front panel 6 connected to the equipment body 4 to be freely foldable, an input means, plural displays installed in the main body 4 and the front panel 6, and a connection means 8 for connecting the main body 4 to the front panel 6 to be

freely foldable and installed in the relative rotation center of the equipment body 4 and the front panel 6. Each side of the plural displays is brought into contact with each other when the displays are opened.

BASIC-ABSTRACT:

NOVELTY - A front panel (6) is foldably connected to a main body (4). A connector (8) is provided to the relative rotational center of the main body and front panel. The main body and the front panel both have displays (1,2) installed individually. The edges of the main body and the front panel are mutually contacted when extending a display.

USE - Portable communication apparatus.

ADVANTAGE - Utilizes narrow installation space efficiently. Reduces size and weight of portable apparatus. Simplifies usage of portable communication apparatus.

DESCRIPTION OF DRAWING(S) - The figure shows the perspective diagram of the portable communication apparatus.

Displays 1,2

Main body 4

Front panel 6
